

All-In-One Touchscreen Hub + Thermostat

The Alloy Fusion hub is a combination thermostat and smart home panel that allows users to control all their smart home devices from one location. Using the on-wall touchscreen unit, residents can run a scene, lock or unlock their door, change the temperature, let someone in the building and more, all from one intuitive interface. Residents can use the companion app to control their home devices, and when combined with a community access solution, like a video intercom, they can receive video calls remotely from guests, vendors or delivery drivers to grant entry.

- Z-Wave hub
- Multisensor
- Security panel
- Cell backup
- Thermostat
- POE
- WiFi enabled
- Video intercom

Technical Specifications

Frequency
908.4 MHz US

Regulation
FCC

Physical Dimensions
7.88 (L) x 7.88 (W) x 0.60 (H) inches

Operating Condition
32° - 104°F (0° - 40°C)

Sensors
Noise (dB)
Light
Humidity
Temperature
Motion
Shock

System
Quad-Core Cortex ARM CPU
Mali400 MP2 GPU
2GB RAM, 8GB FLASH

Color
Black, White

Power Supply
100-240VAC, 50/60z
Power input 5VDC

Warranty
One (1) year standard

Network
Ethernet
WiFi 802.11 b/g/n
Bluetooth
Z-Wave 500
4G LTE*
