

CASE STUDY

Vita Plus

Vita Plus lowered costs and simplified T&E processes

Vita Plus manually processed over 250 expense reports per month, including mileage reimbursement. Seeking to automate T&E processes, the company implemented a web-based system which, over time, became too complex for users to adopt easily. Vita Plus switched to Emburse to lower costs and simplify travel and expense management.

Challenges

- Users struggled with an overly complex system
- Insufficient return on the cost of investment
- Lack of process controls
- Late expense report submissions

Results

- 50% savings with lower-cost system
- 14-day faster reimbursement times
- Simplified T&E processes and improved employee experience
- Increased visibility for easier and more accurate reconciliation

Improved compliance, visibility, and user experience

Vita Plus employees found Emburse faster and easier to use than the prior solution. It was straightforward to implement and required minimal training for users to become proficient. “Employees can figure it out on their own, and that includes everyone from our accountants to our truck drivers,” said Deb Messinger, Controller at Vita Plus.

Mobile capabilities saved significant time for field employees and enabled more timely expense report submissions and faster reimbursements, while system-built rules automatically improved compliance. Corporate card, ACH, and general ledger integrations provided greater visibility into spending and an easier reconciliation process for accounting.

About Emburse

Emburse makes expense management simple. We deliver efficiency and time savings, increase financial visibility, enhance spend control and compliance, and improve the business travel experience.

Industry: Manufacturing

Employees: 3,000

Customer since: 2014
