Secure and compliant communication

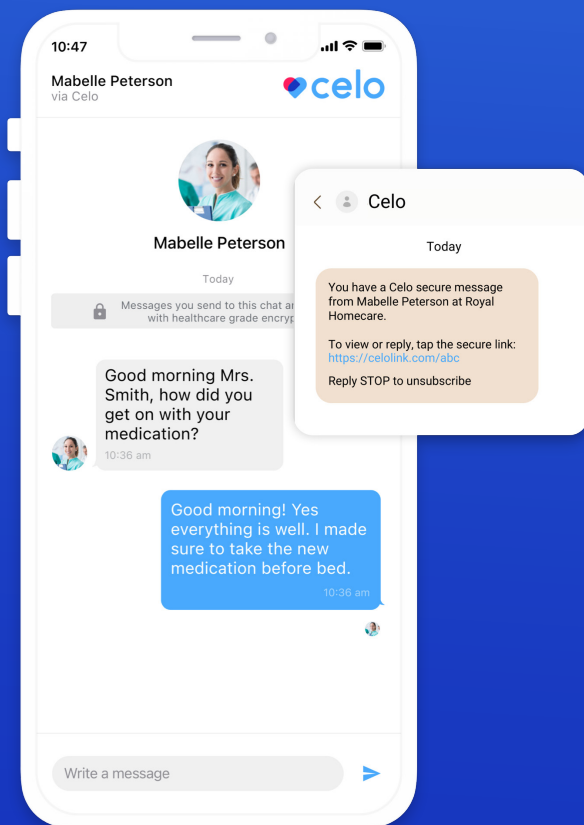

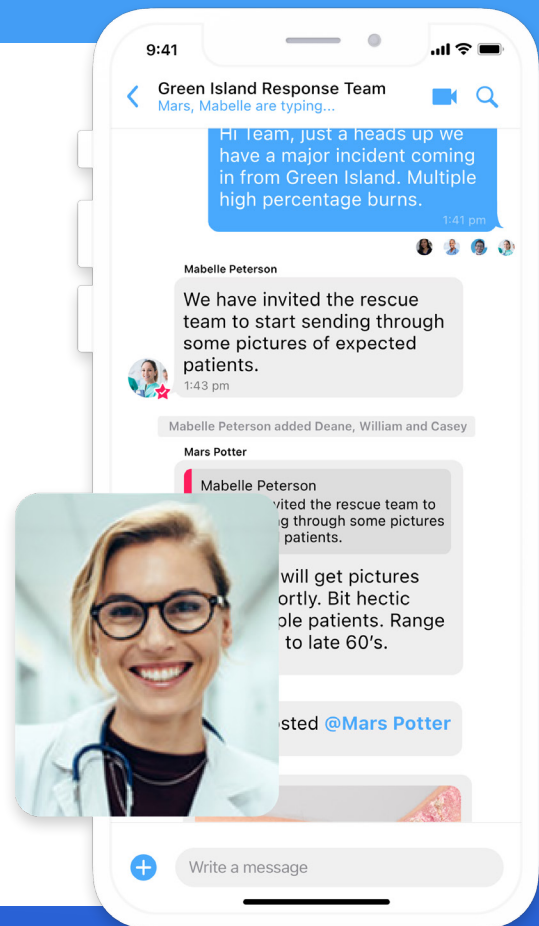

Celo protects your personal and patient information using healthcare grade encryption. Celo is HIPAA compliant and globally accredited, giving you complete peace of mind.

HIPAA Compliant Chat

Message your colleagues without having to share your personal phone number or email address. Switch between messaging and calls to boost team collaboration. Start one-on-one or group calls effortlessly.

Customizable Groups

Keep your team updated with custom groups. With Celo you can see exactly who in your team has read your messages.

Patient Cases

Create a patient case when discussing a patient as a team. Send patient photos, documents and discuss information in a dedicated and secure environment.

Role-based messaging

Make frustrating switchboard calls a thing of the past. Replace all your pagers. With Celo's role-based messaging, staff can easily search for and message the On Call person straight from the directory.

External Chat

Sharing confidential data externally can be tricky. This feature allows you to communicate with a patient or others outside your organization in a HIPAA-compliant way. No app required for external users.

Network & Workspace

Working as a team is easy using Celo. Set up a workspace and invite your colleagues to build up a complete directory for your whole team.

Verified Workspace

Verify your workspace to elevate your trust within the Celo network. Celo users with a verified workspace are elevated above unverified users when searching the network.

Search and Connect

Grow your clinical network by searching and connecting with other Celo members. Choose who can find you in the Celo network by customizing your discoverability settings.

Verify Your Profile

Verify your profile, build trust and help others easily find and connect with you. Celo helps verify your identity, profession and workspace.

You're in control

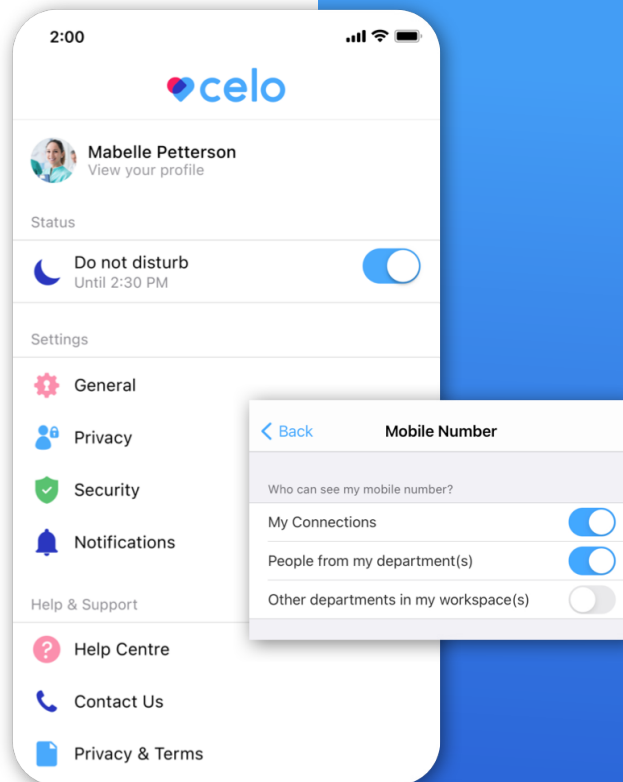

Separating your working life from your personal life can be difficult. Celo gives you full control over your personal information, and helps you switch off whenever you choose.

Protect your personal contact information

Choose who you share your personal email and phone number with; share it with your connections or workspace, or keep it private.

Switch off from work

We empower you to separate your professional life from your private life. Mute specific conversations or use Do Not Disturb to make yourself unavailable.

Secure and HIPAA Compliant Patient Photos & Videos

Separate your personal phone gallery and patient images with Celo's dedicated and secure patient library.

Store patient photos in your secure library

Capture patient photos in-app or import from your personal library to keep them from cluttering your phone. Easily share them with your colleagues.

Consents and Documents

Easily capture signed consent completely within the app and attach to your photos and documents.

What Celo users say about us

Due to the sensitive nature of information discussed and shared in MSF projects globally, providing secure messaging services is a top priority for the Telemedicine program. We look forward to working with Celo to improve access to secure messaging for MSF projects worldwide.

Clara Mazon
Director of Telemedicine
MSF

EMC Healthcare is very concerned with the confidentiality of patient data, for this reason, the use of text messaging applications that meet security standards for medical communication is a must. Celo can meet all the information security and functionality criteria that we set. Apart from that, with its ease of use, Celo can be quickly implemented and used by our doctors and medical staff.

Wildan Djohany
IT Director
EMC Healthcare

Our implementation of Celo was seamless and smooth. We were up and running the day we rolled it out. I'd strongly recommend Celo to other organizations looking to maximize efficiency and productivity.

Roy Eisenberg
Operations Manager
Universal Home Care

Celo has enabled management to communicate effectively with the team in real-time. Rostering responses have been prompt as this is separate from staff's personal emails or messages. A very useful app.

Vashti Bubenicek
Director of Nursing
