

LN4

Thank you for choosing to Fly Ozone.

This paraglider is **UNCERTIFIED**, it does **NOT** have any flight or load test certification but conforms to preEN926-2 competition class.

This is a high performance wing that should only be used by experienced, competent pilots. All pilots and future purchasers of this wing must be made aware of the gliders uncertified state before use or purchase. **DO NOT** fly this wing unless you have the necessary skills to do so.

Ensure that the line set is changed at the recommended interval (150hrs). Paragliding is an extremely dangerous activity that can lead to serious injury or death. The designer, manufacturer, distributor, and retailer cannot and will not guarantee your safety when using this equipment.

This wing should only be used by qualified and competent pilots. This equipment requires a regular material check by a professional service centre. Over time, many factors such as solar radiation (UV), dirt, grease, water, stress and other variables will degrade the materials, performance and safety of this equipment, thereby increasing the risk of injury or death.

Always wear a helmet and fly with a reserve parachute, and back protection. Always carry out careful pre-flight checks before use and only fly when the conditions are safe.

Cheers
Team Ozone
