

## DECORSLAT face based family instructions

Fully parametric width (1200mm max) with auto slat calculation

Fully parametric length

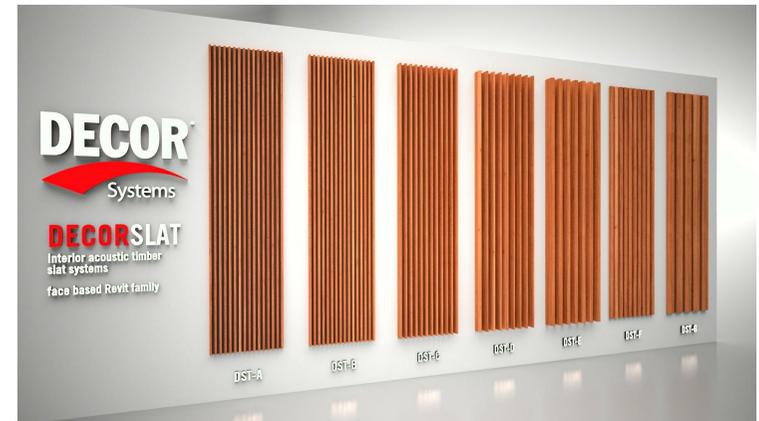

\*max panel height is 2400mm, 3000mm available in MDF substrate only\*

DecorSlat FB 2014 - type selector with nested panel type families - no width adjustment, panels are fixed to standard spacing configuration as designed.

Individual DecorSlat DST-A through to DST-G - full parametric control. Standard configurations in (DecorSlat FB 2014) should be noted and individual panels used for non standard panels only.

End panel - yes/no parameter - standard panels start with slat, end with gap/space. End panel selects start with slat, end with slat.

\*Please note finishes library is indicative only for visualisation purposes, all veneers are subject to availability\*

## DECORSLAT curtain panel family instructions

Fully parametric width (1200mm max) with auto slat calculation

Fully parametric length

\*max panel height is 2400mm, 3000mm available in MDF substrate only\*

DecorSlat CP 2014 - full parametric control. Standard configurations in (displayed curtain wall samples) should be noted and curtain wall overall length adjusted to suit.

End panel - yes/no parameter - standard panels start with slat, end with gap/space. End panel selects start with slat, end with slat.

\*Please note finishes library is indicative only for visualisation purposes, all veneers are subject to availability\*
