

PACKING THE 6G SLIDER

The 6G Slider can be packed in a variety of ways according to your preference.

The Slider Gate is an optional accessory. If you do not use the Slider Gate, it is recommended to use some other form of control line restriction.

Control Line Routing:

Always ensure that your control lines are routed through the correct grommets. The control lines (only) should be routed through the rear-most grommets.

ONLY Control Lines through rear grommets

Slider Gate attached correctly
