

Understanding Sustainability

Sustainability is all about making sure our needs are met in the present while also making sure future generations' needs will be met.

This includes access to, care, and use of natural resources as well as social, economic, and cultural resources.

Sustainability can also encompass;

Kaitiakitanga – Protection, guardianship, responsibility

Manaakitanga – Kindness, care for others, respect

Whanaungatanga – Relationships, team work, collaboration

What does sustainability mean to you?

Sustainability Activity

Brainstorm 3 issues under each of the topics below.

Environmental

How we interact with natural world and how it's doing

Social

How people treat each other and how we treat ourselves

Economic

How money works, which communities get it and why?

Cultural

Ideas, customs, beliefs, art and ways of life?

Pick the issue that is most interesting to you and use the *Story In A Sentence* template to come up with a way to tell a story about that issue.
