

## Spekki Webu

Versatile, resourceful, and driven by a restless creative force, Spekki Webu embodies the limitless possibilities of a truly multidisciplinary artist. Hailing from Delft in the Netherlands, the Mirror Zone founder has built an ever expanding musical universe where past and future continuously collide.

Shaped by his early involvement in the gabber and tekno movements, Webu has developed a sound that is both persistent and ritualistic. Across DJ sets, live performances, and productions, he bends time and space with fierce precision and physical intensity. Always challenging the status quo, his music has found a home on labels such as Amniote, Blue Hour, and Positive Source, where his raw yet forward looking approach continues to push club music into new terrain.

Beyond the dancefloor, Spekki Webu operates as a polymath. Through his Mirror Zone and Optic Portal labels he curates a wider sonic ecosystem, while as a composer and sound designer he explores immersive and spatial worlds with his Signal Transmutations audiovisual project. His installations and performances have been presented at platforms such as Lunchmeat, FIBER, and Nxt Museum, placing his work at the intersection of music, technology, and visual art.

High in energy yet deeply introspective, Spekki Webu navigates the crossroads of experimentalism and rhythm in a way that feels both avant garde and emotionally grounded, continuing to redefine what contemporary club and electronic music can be.
