

NVST

NVST is a Swiss DJ and producer from Lausanne who has become a standout force in international electronic music. Known for her raw, high-energy sets that blend techno, breakbeats, acid, and industrial, she draws inspiration from the free party movement to create a radical, genre-defying sound.

A regular at top festivals and clubs like Dekmantel, ADE, Tresor, and Zhao Dai, her Boiler Room and Dekmantel Amsterdam sets cemented her global reputation. Beyond DJing, she performs live with projects like Drift Institute (with Théo Muller) and Sixsixsevenfortyseven (with Zohar).

Her productions — including six solo albums and releases on Fabric, Tresor, Dekmantel, and Maloca — showcase her precision and experimental edge. NVST also co-directs Big Science, a sound lab for avant-garde music, and hosts residencies on Garage Noord in Amsterdam (since 2024), Kiosk Radio, and Rinse FM, continuously pushing boundaries with a fiercely independent vision.
