

THC

Known for her ecstatic, high-energy sets, THC embodies a playful contrast to the laid-back vibe her initials suggest. Born in Bogotá and based in Berlin, Tania has shaped her wide-ranging electronic music knowledge into a distinctive sound rooted in warmth, momentum, and euphoria.

Blending house and techno with a rolling, driving groove and sharp intuition, her sets move fluidly between peak-time intensity and hypnotic, propulsive rhythms. Guided by a finely tuned sense of mood and flow, she builds long arcs that feel both powerful and deeply immersive, whether on large festival stages or in intimate club settings.

Deeply inspired by queer countercultural movements and the communities that shaped the sounds she loves, THC channels these influences into a dynamic, forward-moving approach to the dancefloor. One of her key outlets is La Noche, the Berlin party series she co-founded in 2023 alongside Byron Yeates and her sibling DHC. Together, they have created an intentional platform that gives back to the local community while offering something genuinely fresh within the city's nightlife landscape.

Following her recent appearances at Nowadays in New York, THC has continued to ignite dancefloors worldwide, including Panorama Bar, Dekmantel Festival, Primavera Sound Barcelona, and São Paulo's Mamba Negra, reinforcing her reputation for emotionally charged, high-impact sets.
