We're dedicated to making your life easier

Communication

Securely message colleagues and contacts in an instantly familiar, easy to use interface.

Collaboration

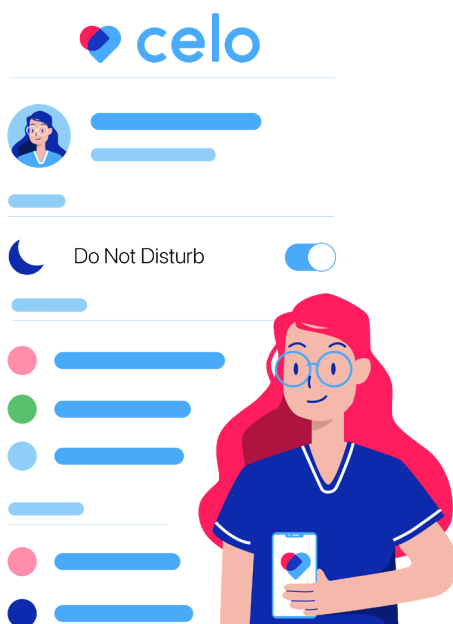

Share advice and images safe in the knowledge that your patient's data, and your own data, is secure.

Community

Find and connect with verified healthcare experts all around the world.

Control

We provide the toolkit, but what you do with it is up to you. You choose who you connect with, and how.

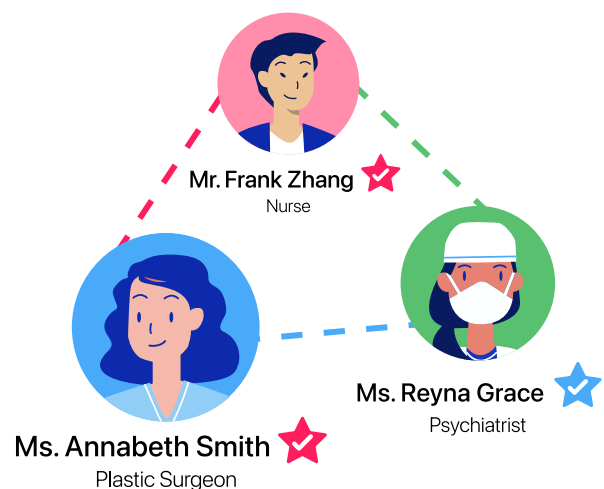

Celo puts you in control

- ✓ Use the Do Not Disturb and Mute functions to choose which chats to take part in and when.
- ✓ Keep your work separate from your personal messages and photos with in-app storage.

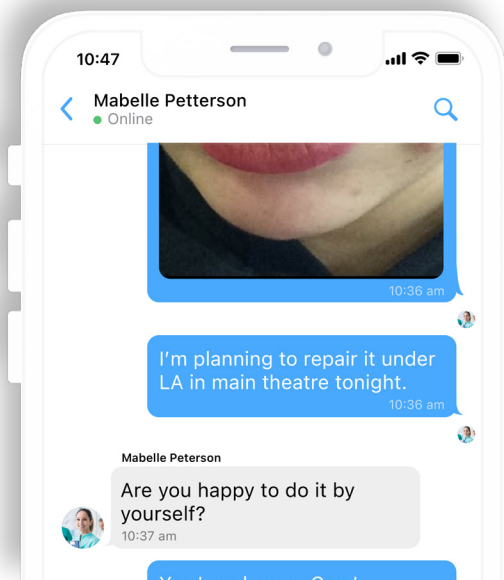

Join a Trusted and Verified Healthcare Network

- ✓ Find verified experts from all over the world.
- ✓ Share knowledge or ask advice from your peers wherever they are.

Secure Chat

A familiar, easy-to-use chat interface with added protection throughout the entire journey so you can communicate effectively without worrying about sensitive information falling into the wrong hands.

Customisable Groups

Create your own groups and manage group members to keep the people that matter informed, coordinate teamwork and share information with ease.

Patient Cases

Use Celo's comprehensive patient-centric case area to help keep all of the care team up to date on patient progress and provide a reference for all communication around an individual patient.

In-app Camera

Capture, annotate, tag and share pictures and videos, plus keep your professional images separate from your personal ones with Celo's in-app library.

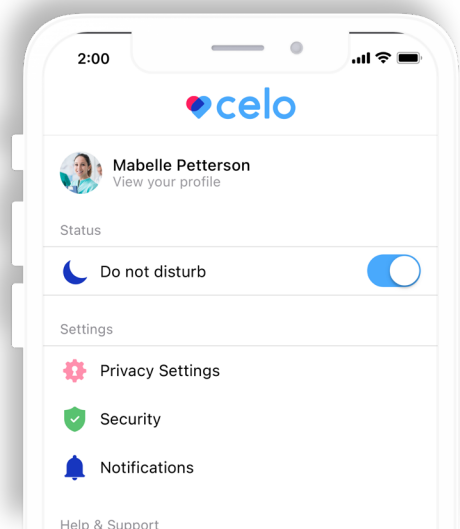

Build Your Network

Grow your network by connecting with people you know, as well as verified and trusted healthcare providers from all over the world.

Complete Control

Celo gives you unprecedented control with the ability to mute conversations, set yourself to Do Not Disturb mode, customise your own privacy settings and connect with peers without having to share your personal contact details.

Patient/Guardian's Consent	
	

Patient Consent

With Celo you can easily capture and document any required patient consent for clinical images using our simple sign-on-glass optional consent feature.

What Celo users say about us

Our team used to rely on WhatsApp every single day! We were constantly sending patient information including photos when we knew we shouldn't really be doing it. Celo has enabled this workflow to continue without compromising on patient safety, and we get the bonus of using a healthcare-specific tool! Thanks Celo!

Ben - Surgical Registrar

With Celo I was able to take a picture of the scar, send it straight to the plastic surgeon he was going to see, and within five minutes have her let me know that the scar looked fine. He didn't need to come to his appointment in Christchurch. It allows us to make better decisions for the patient.

John - Paediatrician

Celo effectively means registrars have an on-call consultant closer to them because they can get more information to them straight away. For patients, the decisions being made about their acute care are being made with better information and more rapidly

Jeremy - Consultant Plastic Surgeon
