

These SKB locks are preset at the factory to unlock at **0 - 0 - 0 - 0**. Make sure you are able to open and close the lock prior to setting your own combination.

1

Adjust dials so the preset factory combination of **0 - 0 - 0 - 0** appears in the "windows".

2

Pull shackle straight up and rotate at 90° counter clockwise so the notch on the shackle aligns with the notch in the lock body.

3

Firmly press shackle down into the body of the lock and rotate it counter clockwise an additional 90°. The shackle should be pushed securely inside the body of the lock so it will not come out.

4

Set the 4 dials to any combination you choose. Make sure each number appears clearly in the window. **Record your combination! Once the lock is set, there is no way to open it without the combination.**

5

Rotate the shackle 180° clockwise. Your new SKB lock is now ready to be used with your new combination. To change the combination again, repeat steps 1 - 5.
