

Welcome to Hightouch's Brand Guide

Our foundation is what we build the Hightouch brand upon. It's what grounds our decisions in all facets of the Hightouch journey.

Who we are

Foundation

Vision

A future where **everyone** can take action on their data.

Mission

Empower **anyone** to use data to reach their potential.

Philosophy

The entire business world is dependent on all forms of data and is truly the core operating system of any organization. Yet, an exorbitant amount of businesses are not able to access the data they need or move it where it needs to go – missing untapped potential.

So we've committed ourselves to illuminate the path for businesses to take. Through an easy-to-use data platform, we enable any individual, regardless of background to be active, empowered participants and finally reach actionable data. In turn, this allows individuals to make better decisions, manage complex events efficiently, and essentially create a new future for the business.

The Hightouch visual identity includes our logo, typography, color palette, illustration, product images, and photography. This visual identity is growing everyday so cheers to more exciting updates ahead.

Visual Identity

Logo

Our logo embodies our entire foundation – data democratization.

Specific letterform tails and stems in the word-mark are at an angle to represent forward-change in our industry. The icon-mark is the simplest representation of data democratization. The mini square represents the old world of data and its opaque accessibility and the large square, moving forward at an angle, is our brand color, lightspeed, and signifies the future of data.

Primary

The mixed green icon-mark and forest green word-mark should be used whenever possible.

Secondary

Use solo icon-mark only when there isn't enough space for the primary logo.

Tertiary

The tertiary logo should only be used for social platforms or iOS app.

Dark background

The primary logo can only be used on a white background. But, if you have to use the logo on any other background color, use the white version.

Light background

If you're unable to use the primary logo and a background color is lighter, please use the black version.

Typography

Aa

Primary – Sharp Display No1 in Bold
