Summary

Solving problems is what make's me tick.

Senior Product Fullstack Engineer specialised in development of B2B and B2C Marketplaces.

Lucky enough to work with awesome companies so diverse as startups, software houses, and product companies. More than companies, I have met very talented people to whom I am grateful for everything.

Open Source contributor, I have contributed to a diversity of projects like React, Gatsby, React-Bootstrap, even started a phew - Js-intl-kitchen-sink, covid-finder, and homeferences website.

I admire and acknowledge everyone contributing.

I give a hand at the Reach4Help organization (those guys continue doing an awesome job).

Co-founder of index.js conference, COVID got the best of us this year, next year we will come stronger.

Reach out to chat or grab a beer.

Experience
