

The cast collection

The impressions are all presented according to Museum numbers. To facilitate the use of the collection a CD is available with a simple database (in Excel) with all museum numbers, types of documents from which the impressions were taken, (both according to the Hallager typology and the CMS typology). The database furthermore has references to primary publications: the CMS Volumes, E. Hallager, *The Minoan Roundel and other sealed documents in the Neopalatial Linear A administration* (1996), M. Tsipopoulou & E. Hallager, *The hieroglyphic archive at Petras Siteia* (2010) and a number of articles where the impressions have been used for the first time. The Hallager typology for Mycenaean sealings will be found in 'The Uniformity of seal use and sealing practice during the LH/LM III period' in *Ariadne's Threads*, A.L. D'Agata & J Moody (Tripodes 3), Athens 2005, 243-65 Hallager 2005a). Except for the CMS volumes all these publications are available together with the cast collection.

Minoan administrative documents
