

Safely access any fixtures in seconds for fast and affordable inspection, maintenance and upgrades.

Solutions for all applications

LED Lighting

CCTV & Surveillance

Networking

Sirens & Alarms

Instruments & More

- ✓ **Safety** Eliminate the risk of working at heights. The light fixture lowers to a safe, ergonomic service position - all from walkway level.
- ✓ **Simplicity** Easy to install and operate. Upgrade to LED without using a ladder.
- ✓ **Savings** Maximized profit through substantially reduced operating and maintenance costs.
- ✓ **Flexibility** Incorporate into new builds or retrofit existing rigid poles to lowering poles.

Cast steel joint with minimal moving parts

Suitable for hazardous locations & harsh environments

Multiple product configurations to suit a range of requirements

Superior 45° lowering pole technology

The only solution for retrofitting existing rigid poles to lowering poles

Swivelpole™ R1 - Range

Maxis™ joint

New Build: Choose from our range of complete pole solutions to suit many applications.

Retrofit: Convert existing poles by installing the Maxis™ joint with the help of the Pole Conversion Tool Kit.
