

# HOW TO CLEAN YOUR SAFE WATER STORAGE CONTAINER

## WHAT YOU NEED

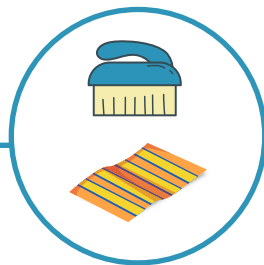

Use soap, safe water, a clean cloth and a scouring brush to clean the inside and outside of the container and the lid.

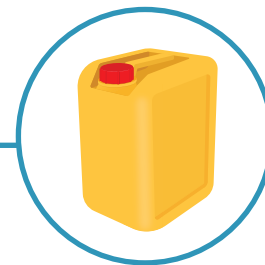

soap

safe water

clean cloth  
& scouring brush

container  
(container should not have  
contained any toxic substance)

## FOLLOW THESE STEPS

1

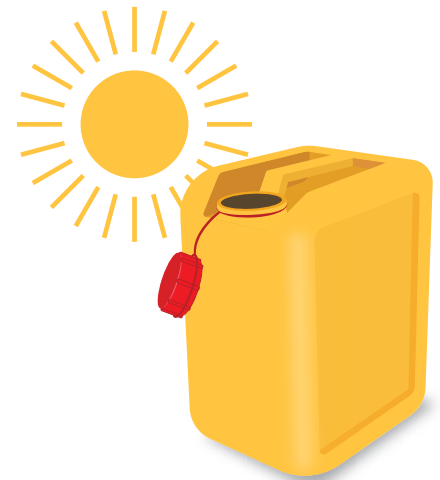

Clean the inside and the outside of the container and the lid with safe water.

2

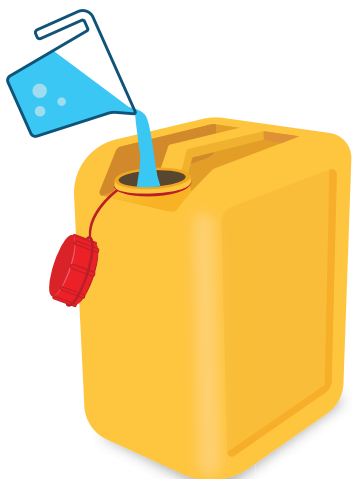

Rinse the container and lid thoroughly with safe water

3

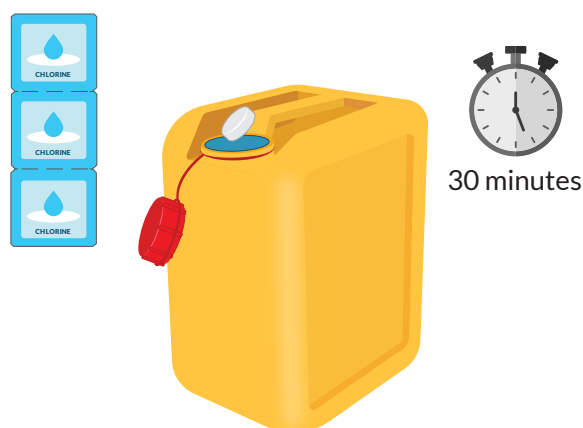

Allow the container and lid to air dry on a clean surface, or dry with a clean cloth

4

Fill the container with treated water to drink.

5

If available, add some chlorine to the container of treated water. Let the chlorinated water sit in the container for 30 minutes.

6

After 30 minutes, you may drink the water or pour the water out and re-fill the container with fresh, treated water.
