## EXPERIENCE

### **The glial initiative** - *Full-stack Web developer*

May 2025 - PRESENT

- Designed and implemented front-end and back-end features on the company's official website.

### **Upwork** - *Full-stack Web Developer*

April 2022 - PRESENT

## PROJECTS

### **The Flash News** - [Github](#) | [Website](#)

A live news feed, constructed using raw API data, includes various features such as:

- A search component enabling the sorting of news data based on specified parameters, including date, relevancy, and publication time.
- Pagination, organising news content into distinct pages.
- Categorized news sources, such as General, Health, Business, and Technology.
- Added framework skeleton to indicate a loading state.

---

- Mobile responsiveness.

### **Ecommerce Store - [Github](#) | [Website](#)**

A mobile-responsive e-commerce website built with the following features:

- Implemented advanced filtering for products by size and color
- Integrated SEO functionalities for enhanced discoverability across social media
- Developed a robust DBMS for efficient management of product details (price, category, sizes).
- Designed and built an intuitive administrative dashboard for product management
- Implemented secure user authentication with Google and GitHub OAuth.

### **Gemini Chatbot Clone - [Github](#) | [Website](#)**

Built upon Google's Large Language Model(Gemini) implemented with features such as;

- Integrated multi-provider web authentication
- Enabled dynamic model selection for Gemini 2.0 and 1.5
- Developed a robust file upload handler.
- Leveraged Firebase for persistent storage of chat history.
- Designed a user-friendly and mobile-responsive interface.

## **EDUCATION**

### **University of Ilorin, Nigeria - *Medicine and Surgery***

June 2021 - June 2028
