

Make data management a source of profit

The open source services
your team needs

Aiven offers a modern cloud data platform that lets developers focus on what they do best, instead of spending time on tedious maintenance work.

Our platform enables your teams to work more efficiently, reduces your data infra costs, and improves database performance, agility, and scalability.

Aiven makes your data work for you – and your bottom line

See why customers love us:

- Multicloud, with easy migration
- Unlimited scalability with zero downtime upgrades
- Automatic backups, updates, and 24/7 live support
- All-inclusive, transparent pricing with no surprises

"Aiven clearly offers superior cost, support and performance."

Adam Hertz
VP of Engineering

"We were able to deliver databases in the cloud and set the entire transformation process within 2-3 months."

Julien Charlot
Head of Databases

"We're really, really happy with the approach we took, and that we chose Aiven as the provider."

Nicolas Chiu
Lead Software Developer

Trusted by industry leaders worldwide
