EDUCATION:

+ ARCHITECTURAL TECHNOLOGIST
Northern Alberta Institute Of Technology
Edmonton, Alberta / 2008

HEY, I'M CRAIG.

I hate seeing anyone make the same mistake twice. This is why I lean on my experience in the industry to ensure a client's vision is delivered in the best way possible: concise, thorough, and correct. I pride myself on building relationships with all stakeholders. By understanding everyone's role, it allows me to deliver a smoother project with less conflict and more value. I welcome open and honest communication and I'm always excited to discuss ideas and experiences; anything that provides an opportunity to learn, teach, and apply to the next project.

As a senior architectural technologist with a passion for design, I ensure the vision of the project is carried through from start to finish. My experience and long-term approach provides value to all phases: conception, production, procurement, construction, and warranty. I've overseen construction on a wide range of project types, complexities, construction methods, and budgets from 1M to 51M. I have the ability to communicate effectively with the Contractor, Client and user group as well as understand and imply clients/architects visions during the construction phase, ensuring that conflict resolution will be effective and fit within the project budget.

WHAT I'VE DONE (PROJECT EXPERIENCE)
