Edmonton, Alberta / 2006

+ MASTERS OF ARCHITECTURE | M.ARCH.

University of Calgary - Architecture
Calgary, Alberta / 2011

HEY, I'M ERIN.

First and foremost I'm passionate about art and design. I'm detail oriented and love exploring new ways to solve problems. I believe that my listening skills are valuable in making sure client's needs are understood and reflected in the project. I strive to bring fresh and positive energy to the project team and this unique set of skills is ultimately reflected in the design.

As a registered architect with experience in a variety of sectors such as commercial, corporate office, light industrial, educational, residential, and hospitality I bring more than ten years of experience to the project. Taking a meticulous approach to design, beginning with a gathering of information from various sources including the client, community and site context. Analyzing this information will then serve to inform and shape the goals and vision of the project, ensuring the design and vision are substantiated within the context. Then the fun begins - Collaboration and engagement with people to understand their needs and goals in order to create a design that meets and exceeds expectations. My absolute favorite thing is teaming up and working with local builders, craftsmen and makers to create the extraordinary.
