EDUCATION:

+ ARCHITECTURAL TECHNOLOGIST
Northern Alberta Institute Of Technology
Edmonton, Alberta / 2018

HEY, I'M VINCENT.

I'm an Architectural Technologist with a broad range of experience in both design and construction fields of the industry. I pride myself on being a strong listener which leads to a comprehensive understanding of the various scopes and perspectives of stakeholders in producing deliverables. My technical skill set, in combination with an eye for design, brings a flexible perspective throughout the entire project life-cycle.

In my time in the AEC industry, I've consistently pushed to incorporate Building Information Modeling (BIM) processes and Lean practices in pursuit of his passion for innovation and creativity. I strongly believe that design need not be compromised through close collaboration with project stakeholders. I've never been one to shy away from new challenges. My range of experience extends from conceptual phases to design development reports and through to completion.

I believe that I'm able to seamlessly integrate into any team, with my eagerness to provide value and efficiency on all of projects. I carry the mentality of "ask me anything, teach me everything". I'm equipped with an open mind of learning from others and passing on any knowledge that I possess in pursuit of growing the adoption of BIM and Lean principles in the industry.

WHAT I'VE DONE (PROJECT EXPERIENCE)

PROJECT	ROLE	TYPE	LOCATION
MILLS MEMORIAL HOSPITAL TERRACE, BC	Trades Coordination, Documentation/Drawings	Construction Solutions BIM + Facility Management	Terrace, BC
UNIVERSITY OF ALBERTA NORTH POWER PLANT INTERIOR RENOVATION	Documentation/Drawings	Commercial Modernization	Edmonton, AB
