

**Wood Veneer** combines exceptional durability with the warmth and richness of real wood. Whether prominently featured or used as an accent, our standard veneers offer versatile options for walls, columns and elevator interiors.

## PRODUCT FEATURES

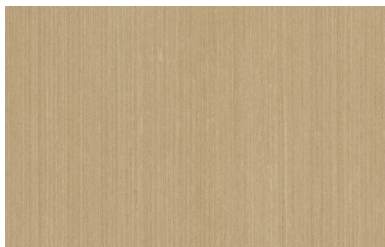

- Suitable for interior applications.
- Wood Veneers are available exclusively in F+S Systems.

## PRODUCTS & APPLICATIONS

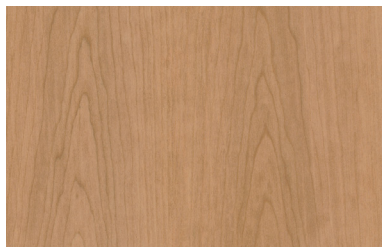

F+S SYSTEMS	DESCRIPTION
<ul style="list-style-type: none"> <li>• LEVELr Wall Panel &amp; Column System</li> <li>• LEVELe Wall Panel &amp; Column System</li> <li>• LEVELr Elevator Interiors</li> <li>• LEVELe Elevator Interiors</li> <li>• LEVELc-2000 Elevator Interiors</li> </ul>	<p>Wood veneer is a naturally sourced product so variations in color and grain patterning may occur.</p> <p>All veneers are finished with three coats of CAB acrylic lacquer for superior abrasion resistance and non-yellowing performance while maintaining the richness and authenticity of genuine wood. The finished surfaces have a satin-like appearance.</p> <ul style="list-style-type: none"> <li>• Standard veneer sizes are 48" x 120" (1,219mm x 3,048mm).</li> <li>• Custom sizes may be available for an additional charge and may require a longer lead time. Please call to discuss the specific needs of your request.</li> </ul>

## STANDARD VENEERS

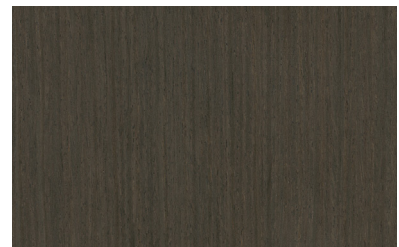

Due to the inherent characteristics of wood veneer, significant variations in color and grain patterning between any issued control samples, compared to, as well as within, actual production runs should be anticipated.

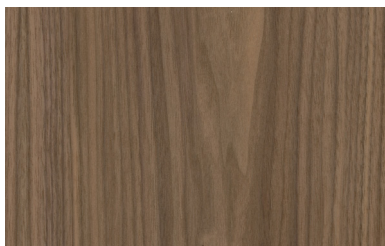

CHAMPAGNE

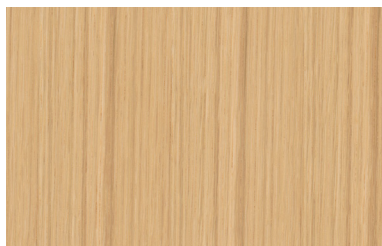

CHERRY

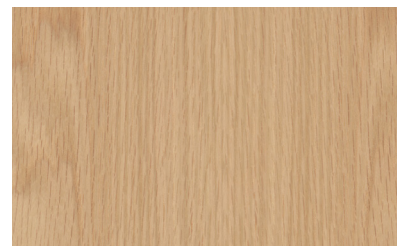

EBONY

WALNUT

WHITE OAK, PLAIN

WHITE OAK, RIFT

## WOOD VENEER CHARACTERISTICS

FIRE RATING	ROUTINE MAINTENANCE
Wood Veneer is NFPA and IBC class A fire rated and UBC class 1 fire rated.	Veneer surfaces can be maintained using standard commercial cleaners and polishes formulated for use on interior woods. Additional details can be found in the Architectural Materials Care & Maintenance document on our website.
