

Looking to transform your manufacturing operations?

In today's competitive manufacturing landscape, staying ahead requires smart solutions. That's where IoT comes in. Underpinning predictive maintenance processes, robust security posture, and valuable data insights, IoT solutions enable you to operate your manufacturing assets with maximum efficiency and minimal risk.

Our team are experts in IoT technology and understand the trends and challenges in your industry. We offer a range of services and solutions that can help you drive efficiency and foster process innovation. We're committed to simplifying these tasks and supporting you to reach your goals. Partner with us for secure IoT solutions that empower you to achieve peak performance.

Transform your organisation with state-of-the-art IT services.

Boost productivity and product quality while safeguarding your data with industry-standard security measures. Our innovative technology will help you reduce operational costs and promote sustainable practices.

Trust us to provide you with the tools you need to succeed. Our end-to-end IoT solutions are designed to help you securely connect OT to IT, providing valuable business insights, mitigating risks, and complying with governance and regulations. With our experience and expertise, we can help you leverage world-class technology to achieve your business goals.

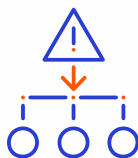

How we can help

Addressing your industry's unique challenges to achieve a competitive edge:

Advanced Smart Manufacturing

IoT-enabled solutions can help you optimise production, reduce downtime, and improve product quality in real time.

Alignment and Risk Reduction

Secure your manufacturing data with scalable, flexible solutions to ensure compliance and avoid regulatory fines.

Predictive Maintenance and Disruption Prevention

Leverage IoT data to predict equipment failures, minimise disruptions, and reduce your maintenance costs - ensuring uninterrupted manufacturing operations.

Remote Monitoring and Control

Access and control your machinery remotely to reduce resolution time, utilising IoT for optimal performance and immediate anomaly response.

End-to-End Supply Chain Visibility

Streamline your inventory management, reduce lead times, and improve efficiency from raw materials to finished products by interconnecting various data sources.

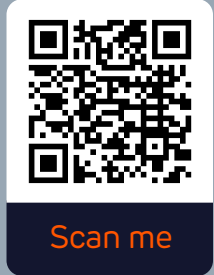

Data Analytics for Operational Excellence

Harness data analytics to optimise manufacturing operations, resource allocation, and quality control - enhancing your decision-making and production processes.

We're here to help

Secure, simplify, and scale your manufacturing operations with our trusted expertise, robust infrastructure, and industry-leading visibility and control.

Talk to our team today to gain insight into your manufacturing assets.

Nine reasons customers choose to work with us:

01 Trusted by Cisco

Aside from being a Cisco Gold Partner with numerous technology specialisations. We're also one of the largest single resource suppliers to Cisco's Customer Experience team in the UK.

02 Extensive Cisco accreditations

We have more Cisco accredited engineers and consultants than any other Gold partner headquartered in the north.

03 Personnel profiles

We provide profiles of named engineers, consultants and project managers, highlighting skills and experience for review before our customers engage.

04 Trusted by Public Sector

We have a proven track record of delivering solutions that run mission-critical and lifesaving services for NHS trusts and civil service.

05 Fixed priced projects

We are confident in our delivery, which means we are able to run fixed cost projects, meaning we carry the risk, instead of our customers.

06 Disruption through innovation

We have an impeccable track record in displacing large, and often global, cumbersome systems integrators.

07 The ADIOlogy® Method

We developed our own proven way to assess, design, integrate, and operate solutions, guaranteeing repeatable success, and maximising ROI.

08 Strict adherence to standards

We align with PRINCE2, TOGAF, ITIL and ISO, and deliver services with security cleared personnel where required.

09 Customer success plans

We don't walk away after project delivery; we provide and adhere to success plans to ensure our customers are confident in operating new technologies.

Transforming business, together.
