# Cisco devices for Microsoft Teams

Collaboration

## Elevate your Teams meetings with Cisco devices

Empower your employees to navigate the world of hybrid working and seamlessly adapt to multi-platform meetings. With 85% of users having to switch between two or more collaboration platforms a day, a more flexible unified approach is required, which is why Cisco and Microsoft have partnered to create the best user experience for all. You can now rely on the Microsoft Teams experience you know using Cisco collaboration devices.

### Why Cisco devices for Microsoft Teams?

In addition to the current RoomOS user experience, Cisco is enabling a full-featured Microsoft Teams Rooms (MTR) experience on selected desk and room Cisco hardware solutions.

Enjoy elevated Microsoft Teams Rooms collaboration powered by device intelligence, hassle-free admin, and engaging design, embedded into a selection of next-generation Microsoft Teams Rooms systems, displays, and Teams panels from Cisco.

- **Reimagine workspaces**  
Equip more workspaces for hybrid work with an extensive portfolio of devices.
- **Freedom of choice**  
Get the full value of Microsoft Teams Rooms.
- **Intelligent meetings**  
Benefit from built-in audio and camera intelligence for more inclusive meetings.
- **Access from anywhere**  
Rely on security and compliance you already know you can trust.

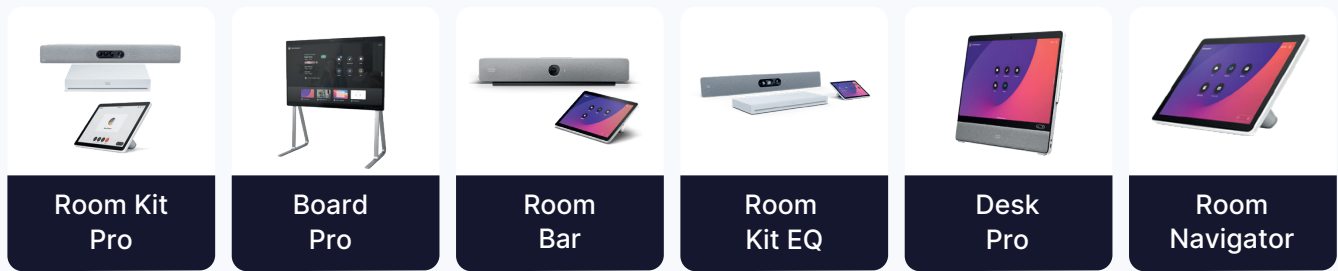

### A familiar Microsoft Teams experience

Experience the full value of Teams meetings on certified Cisco video endpoints for any workspace, from the desk and focus rooms to ideation spaces and large boardrooms.

- **Microsoft Teams and Webex fully-featured meetings**  
Join feature-rich Webex meetings and access thirdparty apps, when running the device in native Microsoft Teams mode.
- **Breath-taking camera views**  
Leverage optimised people framing and intelligent views to create more equitable, true-to-life meetings for every participant.
- **No distractions, just crisp sound**  
Block out unwanted background noise and enjoy crystal-clear sound to ensure frictionless and productive collaboration with sophisticated audio controls.
- **Vibrant presentations**  
Transform your presentation with exceptional content via HDMI or wirelessly, via Miracast, Direct Network sharing or Microsoft Teams Sharing.
- **Intuitive controls at your fingertips**  
Join your next meeting with a single touch, and benefit from built-in room sensors to track occupancy and workspace conditions.
- **Enhance workspace management**  
Streamline cloud device management with a single view of all device endpoints, and rich workspace analytics in Control Hub, alongside Teams Admin Center.
- **Seamless onboarding**  
Easily configure devices for native Webex, or run native Microsoft Teams Rooms without hassle.

## These devices are just the start of the Cisco and Microsoft Teams relationship...

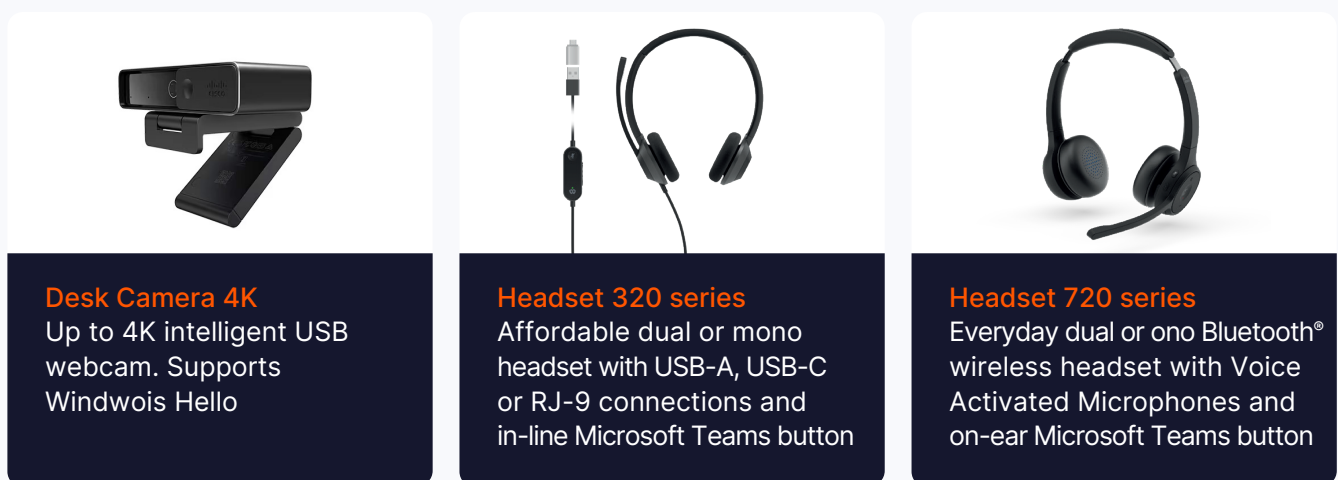

Cisco devices with Microsoft Teams. A complete suite of certified video endpoints.

- Meet the more complex needs of large meeting rooms with the award-winning Board Pro in 55" or 75" with unparalleled video and co-creation capabilities.
- The Room Bar is the most capable device for Huddle and smaller collaboration spaces, and for focus rooms and personal spaces, the Cisco Desk Pro runs the Microsoft Teams Display application.

## Microsoft Teams certified peripherals

Intelligent peripherals to pair with the Teams app and the Cisco Desk Series

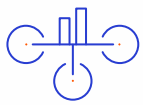

- Available now, the Desk Camera 4K is an intelligent 4K UHD USB webcam which supports best overview framing and Windows Hello.
- The Headset 320 and Headset 720 provide wired and wireless connectivity options, along with a Microsoft Team button to join scheduled calls with one click.
- Leveraging the unique AI-powered noise removal solutions, the Headset 720 also includes a voice activated microphone.

## Why Forfusion?

Forfusion specialises in supporting and delivering Cisco and Microsoft Solutions into mid-market and enterprise. As an Advanced Collaboration Architecture Specialised Partner, we can help advise on suitable Cisco Microsoft Teams Rooms devices for your organisation's needs. Our highly trained consultants can also work with you to demo the devices so you can experience Microsoft and Cisco collaboration first-hand.
