PERSONAL STATEMENT

The privilege to leave a lasting impact is an opportunity architects are gifted with in every building they design. I believe architecture holds the power to improve the lives of people and solve many of the world's problems. I find great meaning and significance in having the opportunity to serve society and leave the world a little better or more beautiful. I have a lot of relatable life and world experience that gives me a unique vision to contribute. I still have very much to learn but I am humble always eager to learn and improve my abilities.

HOLISTIC APPROACH
