centers nationwide

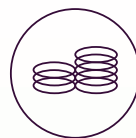

Safe. Secure. Always Ready.

With over 35 years of experience and safeguards that go far beyond standard cryostorage practices, Reprotech provides advanced monitoring, strict protocols, and facilities built to withstand hurricanes, tornadoes, and wildfires. When you store with us, you can be confident your specimens are protected for the future.

Trained & Experienced Staff

Our Cryostorage Specialists undergo extensive training and manage hundreds of specimen shipments each week. Every step follows strict protocols we've refined over 35 years, so your specimens remain protected and ready when you need them.

Simple Fees

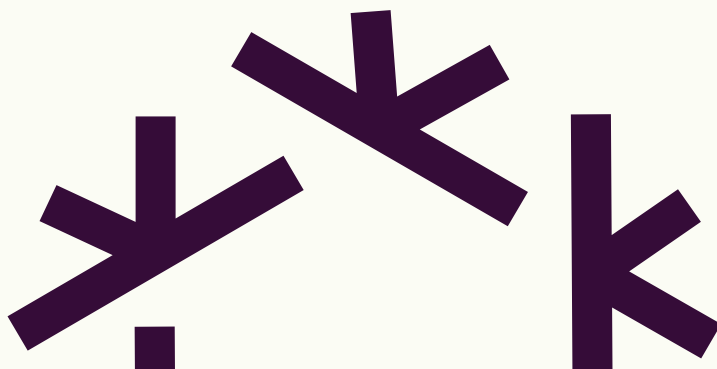

We believe in a straightforward fee structure.

- No handling or account setup fees (often charged by commercial sperm banks).
- No extra storage fee for semen or oocytes when embryos are also stored.

Safe Storage Facilities

At Reprotech, we've built five cryostorage facilities across the U.S. with safety as the top priority. Each site is strategically located and maintained by our trained specialists.

- Built for resilience — engineered to withstand hurricanes, tornadoes, and wildfires.
- 24/7 monitoring — continuous surveillance and alarms on all tanks and rooms.
- Temperature assurance — automated systems track and record cryogenic conditions.
- Secure access — only authorized staff can handle and monitor specimens.
- Ongoing validation — tanks are regularly tested, maintained, and retired on schedule.

The Nevada facility has fire-safe storage rooms capable of withstanding temperatures up to 1200°.

The Minnesota facility showcases EF5 tornado-proof storm rooms.

The Connecticut facility's storm room safeguards against Nor'easter, hurricane and tropical storm winds.

The Texas facility is equipped with Category 5 hurricane-proof storm rooms.

The Florida facility features Category 5 hurricane-proof storm rooms.

Shipping & Transportation

Specimens shipped to Reprotech travel in specialized cryogenic tanks, tracked from pickup to delivery.

- We coordinate directly with your fertility clinic.
- In-person regional Reprotech courier services are available in select regions.
- Every tank is tagged with a GPS tracker for added oversight.
- For shipments requiring non-regional shipping, specimens travel via UPS Premier Healthcare with priority handling, real-time tracking, and proactive support.
