Experience

Fullstack Developer (Part-time)

Sept 2024 - Present

DITINEX ENTERPRISE

Remote

- Financial Dashboard: I developed the site using Next.js and collaborated with backend teams to integrate APIs, fix critical bugs, deployment pipelines and add new features.
- Custom Wordpress Plugin with AI: Developed a custom plugin from scratch using PHP, HTML, CSS, JavaScript, with MySQL as database for a cargo insurance company. Integrated OpenAI using APIs for determining correct insurance for cargo type.

Fullstack Developer (Full-time)

Jun 2023 - Aug 2024

G4GAME PVT. LTD.

Remote, Kolkata

- Inhouse website: Developed the inhouse website using Next.js and MUI which increased the traffic and visibility by 200%. Created backend using Nodejs with Expressjs using MVC framework.
- REST API for Unity Game: Created APIs in PHP and MySQL as Database

Personal Projects

Pdf Insight | *AI web-app to talk to your PDFs* | [Live Demo](#)

- A smart AI app to upload your PDFs and chat with it to learn and understand better and faster.
- Facilitating users' logins to websites without having to remember their credentials
- Upload your PDFs and chat to learn them better
- Technology Used: Next.js 14 App Router, tRPC, TypeScript, Prisma ORM, Tailwind CSS, Kinde Auth, Langchain, Pinecone, OpenAI API

Dungeon-Dash | *Command-line RPG game* | [NPM Package](#)

- DungeonDash is a command-line RPG game where players embark on an epic adventure through various dungeons.
- Published as an NPM package for anyone from anywhere to install and start playing from their CLI.
- Technology Used: NodeJS and CLI tools.
