

Vega is seeking to hire a skilled **Data Science Engineer**. In a rapidly growing cloud startup, you have the opportunity to join an amazing team led by awesome founders, who have over a decade of experience. The ideal prospect is highly productive, fun, and thrives in a fast-paced startup environment.

Our Culture

Our number one goal at Vega is happy culture, happy people, happy clients. In addition, we are obsessed with helping businesses achieve greater security and optimization. We encourage creative problem solving, rapid innovation and bold goal-setting. Our relatively flat organization structure keeps everyone informed and enables people to get involved in solving the problems they care about most. We are a close-knit team moving fast to deliver value to our customers and continue pushing the envelope as we innovate for ease of cost savings & security in the public cloud.

Your Mission

- Data management through munging and query authoring in environments with structured and unstructured data
- Ability to script, program data, and automate tasks
- Model testing and analytics
- Build processes validating data transformation, data structures, metadata, dependency and workload management

Requirments

- Team player with a positive attitude
- Independent thinker capable of moving fast
- Bachelor's degree in computer science or related field
- 3-5 years in technical experience
- Background of successfully manipulating, process and extracting value from data sets for data profiling and data analysis
- Exposure to visualization experience in dashboards
- Exposure to data warehousing solutions and associated pipelines

Please submit your resume to careers@vegacloud.io with the title of the role you're seeking as the subject line.
