ENGLISH

A Better Fit for You and Your Bike

Your bike should feel comfortable, natural, and right for you. With the Smartfit Q4 system, we offer both Bike Sizing and Bike Fitting to help you choose the right bike or fine-tune the one you already own.

We take precise measurements of your body and your bike, then use that information to recommend the right frame size, riding position, and setup for your needs.

The result is a bike that feels better, fits you more naturally, and gives you greater comfort and confidence every time you get on it.

Bike Fitting | This is for you if you...

- want your bike ergonomically adjusted to fit your body.
- want to feel more comfortable on longer trips.
- are looking to prevent or reduce discomfort in your knees, back, neck, or wrists.
- want your position on the bike tailored to your individual needs.
- want greater comfort and confidence on your bike.

Bike Fitting | Step-By-Step

1. **Measuring** | For a bike fitting, we measure both you and your bike. Your bike is placed on the Q4 and then precisely measured using the laser.
2. **Seating position** | We then determine the riding position that best suits you, your body, and your preferences – including factors such as your cycling style.
3. **Cycling adventure** | Your bike is then ergonomically adjusted to fit you, so you're ready for your next cycling adventure.

Stop by and find your perfect fit!

Our Bike Fitting service is available by **appointment** only. This gives us the time to carefully adjust your bike to fit you, your body, and your riding needs.

Bike Sizing | This is for you if you

- are shopping for a new bike.
- aren't sure which frame size is right for you.
- want to feel more confident before making your purchase.
- want your new bike to feel comfortable from the start.

Bike Sizing | Step-By-Step

1. **Body Scan** | We start by taking your measurements with the system and the laser meter. All relevant body measurements are then transferred directly into the system
2. **Bike Finder & Frame Size** | Next, we can select and compare up to three bikes. The system will instantly recommend the right frame size for you and suggest suitable alternatives where available
3. **Saddle height & Test Ride** | Once you've selected a bike, the system also recommends the right saddle height, this allows us to adjust the bike to you right away – so you're ready for your test ride.

Stop by and get sized!

No appointment is necessary for Bike Sizing. Just stop by, and we'll help you find the right frame size and saddle height in just a few minutes.

Smartfit Q4

The Smartfit Q4 is the **all-rounder system**.

The Smartfit Q4 uses precise laser technology to measure both you and your bike. This gives us the information we need to recommend the right bike size or adjust your current bike to better fit your body and individual needs.

Whether you need a quick Bike Sizing or a more detailed Bike Fitting, the Q4 helps us create a setup that feels comfortable, natural, and right for you.

For a better fit, greater comfort, and more enjoyment on your bike.

About Smartfit

Smartfit stands for more than **25 years of developing professional measurement and consultation systems for bike retailers**.

With these tools, we can precisely analyze your body measurements and ergonomically adjust the bike to you – **from frame size to riding position and beyond**.
