

TANIUM LEARNING CENTER COURSE CATALOG

Whether you are just getting started or ready to expand your skills and knowledge of Tanium, our comprehensive training will show you how to fulfill your goals at speed and scale.

OVERVIEW

Tanium training provides enhanced knowledge and understanding of Tanium products, giving learners the confidence they need to expand their abilities and get the most out of their Tanium deployment. Whether you are just getting started or ready to expand your skills and knowledge of the Tanium Platform, our comprehensive training will show you how to fulfill your goals at speed and scale.

ABOUT TANIUM TRAINING COURSES

HIGHLY EXPERIENCED TRAINERS

Attendees of Tanium training capitalize on the expertise that Tanium's Certified Instructors provide in class to cultivate the knowledge, skills, and proficiency to succeed at their jobs. Our instructors are not only accredited but are also required to uphold their certification as a prerequisite for delivering training. Their proficiency in conveying key aspects of Tanium is unparalleled, ensuring that all participants receive an optimal learning experience.

IACET ACCREDITATION

The Tanium Global Enablement team is pleased to announce we have been approved for accreditation through International Accreditors for Continuing Education and Training (IACET). This accreditation allows for the addition of Continuing Education Units (CEUs) to our training courses. CEUs will be available beginning May 1, 2022, to individuals who complete any of the following Tanium Training Courses.

See [IACET FAQ](#).

OUR TRAINING OFFERINGS

MULTIPLE MODALITY OPTIONS

Modality	Modality Option	Abbreviation
Self-Paced Web-Based Training	N/A	WBT
Virtual Instructor-Led Training	Multi-Organization vILT	vILT Public
	Dedicated Customer vILT	vILT Private
Onsite Instructor-Led Training	Dedicated Customer ILT	ILT

COMPLIMENTARY COURSE OFFERINGS AVAILABLE FOR SELF-REGISTRATION

SELF-PACED LEARNING (WBT)

Tanium offers our valued customers access to our library of complimentary WBT courses. Click [here](#) to learn more about how to access these trainings on our Tanium Learning Center (TLC).

MULTI-ORGANIZATION VILT (PUBLIC)

Learners will have access to self-register into our Public vILT classes by logging into Tanium Learning Center (TLC). Classes are available in North America, Asia Pacific, Japan, and European time zones.

COURSE OFFERINGS AVAILABLE FOR PURCHASE

* In the catalog below, courses marked with a dollar sign (\$) indicate that additional fees are applicable

SELF-PACED LEARNING (WBT)

Licenses for WBT are available for purchase on a per-learner basis and remain valid for the duration of one year from the date of acquisition. Upon purchasing, learners will gain access to the training content by logging into the Tanium Learning Center (TLC).

VIRTUAL MULTI-ORGANIZATION VILT (PUBLIC)

Individual seats for our virtual public classes are available for purchase. C Classes are available in North America, Asia Pacific, Japan, and European time zones. Our courses offer comprehensive instructions on the fundamentals of Tanium and can serve as an effective preparatory tool for learners interested in pursuing Tanium certification exams. Class schedules may be found on the [Tanium Training Calendar](#).

DEDICATED ILT/VILT (PRIVATE)

We offer both dedicated (Private) onsite and virtual training sessions. Each session can accommodate up to 10 students, with a maximum capacity of 20 students per delivery, ensuring a focused and effective learning environment.

OTHER LEARNING RESOURCES

- Tanium's [Resource Center](#) is an excellent resource to refer to while official training content is unavailable. It is a wealth of information, including links to Tanium product module documentation, knowledge articles, user guides, and [Tanium Certifications](#).
- Check out the Tanium [YouTube page](#) for the latest Tanium Tech Talks, Customer Stories, and Tanium in Action series.

HOW TO PURCHASE TRAINING

Training courses are available for purchase for new and existing customers. For information on our training courses or to receive a quote, please contact your Tanium/Partner Representative. If you are uncertain of who your representative is, please reach out to training@tanium.com and we will assist you in connecting with the individual responsible for your account.

See [Cancellation & Refund Policy](#).

TANIUM LEARNING CENTER COURSES

INTRODUCTORY COURSES

Our Introductory Courses provide a solid foundation for beginners and are an accessible entry point to begin your journey on the Tanium platform. You will grasp fundamental concepts, terminology, and gain a solid foundation to build upon.

WHAT DOES TANIUM DO

Delivery | Duration

WBT: 45 minutes

Cost

Complimentary

Description

[What Does Tanium Do](#) introduces you to the Tanium platform where you will explore several use cases on how Tanium can help secure and manage devices and applications across increasingly complex and distributed networks. You will see how Tanium modules provide visibility, control, and remediation across all your endpoints to create a safe and higher-performing digital estate from a single platform

Prerequisites

None

GETTING STARTED WITH TANIUM

Delivery | Duration

WBT: 3 hours | Public vILT: 8 hours

Cost

Complimentary

Description

[Getting Started With Tanium](#) introduces the Tanium platform's unique architecture and benefits, along with the key functionality of its Core modules, including asking questions, analyzing data, and connecting with external destinations. You will also receive a brief preview of additional Tanium modules available to support more advanced Endpoint Management and Endpoint Risk & Security use cases.

Prerequisites

None

TANIUM REPORTING

Delivery | Duration

WBT: 3 hours

Cost

Complimentary

Description

[Tanium Reporting](#) prepares Tanium Users with the knowledge and skills to explore data across Tanium modules, create custom reports, build dashboards, filter, and share data within an organization.

Prerequisites

None

TANIUM AUTONOMOUS IT

Delivery | Duration

WBT: 15 minutes each (90 minutes total)

Cost

Complimentary

Description

The series is a collection of short microcourses that introduce Tanium users to the new and exciting features of the Tanium Autonomous IT platform. In approximately 15 minutes or less, each course provides a foundational understanding of what the given feature is, its benefits and use cases, a short demo of the feature in action, and answers to commonly asked questions.

Prerequisites

None

FOUNDATIONAL COURSES

Our Foundational Courses are designed for those who want to build a strong knowledge base and deepen their understanding of the Tanium platform. They cover core principles and industry standard best practices. You will gain a comprehensive grasp of the subject matter, setting you up for success in our more advanced topics.

TANIUM ESSENTIALS

Delivery Duration	WBT: 8 hours Public vILT, Private vILT/ILT: 3 days
Cost	\$
Description	Tanium Essentials is an immersive training covering the primary operational use cases of the Tanium core platform and modules.
Prerequisites	Required: Getting Started With Tanium

INTERMEDIATE COURSES

Our Intermediate Courses are tailored for individuals looking to take their expertise to the next level. Dive deeper into each subject with in-depth knowledge, practical applications, and hands-on experience. These courses provide the tools and insights needed to excel in your field.

TANIUM ADMINISTRATION 3.0

Delivery | Duration

WBT: 3 hours | Public vILT, Private vILT/ILT: 12 hours

Cost

\$

Description

[Tanium Administration](#) is designed to help you understand, maintain, and troubleshoot your Tanium Cloud environment. Tanium has several tools to help administrators do this, including Cloud Portal, Question and action history, Role-Based Access Controls and Group Management.

Prerequisites

Recommended: Getting Started With Tanium and Tanium Essentials (or equivalent knowledge)

TANIUM GATEWAY

Delivery | Duration

WBT: 4 hours

Cost

Complimentary

Description

[Tanium Gateway](#) is an immersive training covering the benefits, functionality, and use cases for the GraphQL based API interface. Participants learn how to use GraphQL to interface other systems (such as a CMDB or SIEM) with Tanium's powerful abilities to gain valuable network visibility, assess potential risks, plan for threat remediation, and empower security and IT operations teams to continuously secure, control, and manage every endpoint at speed and scale.

Prerequisites

Recommended: Getting Started With Tanium and Tanium Essentials (or equivalent knowledge)

TANIUM CERTIFICATE MANAGER

Delivery | Duration

WBT: 2 hours

Cost

Complimentary

Description

[Tanium Certificate Manager](#) covers installing, updating, and configuring Certificate Manager. Participants learn how to remediate and manage certificate problems. This course is intended for customers, partners, and internal audiences

Prerequisites

Recommended: Getting Started With Tanium

TANIUM CLOUD DEPLOYMENT

Delivery | Duration

WBT: 3 hours | Private vILT/ILT: 8 hours

Cost

\$

Description

[Tanium Cloud Deployment](#) is intended for partners deploying Tanium as a Service. This comprehensive and hands-on course prepares partners with the knowledge and skills to qualify, plan, set up, and operationalize customer deployments.

* This course is intended for Partners and has a rare use case for customers.

Prerequisites

Recommended: Getting Started With Tanium and Tanium Essentials (or equivalent knowledge)

TANIUM CUSTOM CONTENT

Delivery | Duration

WBT: 3 hours | Public vILT: 8 hours

Cost

Complimentary

Description

[Tanium Custom Content](#) will show you how to apply your existing scripting knowledge to more in-depth techniques within the Tanium Environment. By the end of this course, you will be able to explain how content runs on Tanium endpoints and how it can impact endpoint devices. This course will walk you through creating and testing content using Tanium's recommended best practices.

Prerequisites

Recommended: Getting Started With Tanium

TANIUM THREAT RESPONSE ANALYST

Delivery | Duration

WBT: 3 hours | Public vILT: 8 hours

Cost

Complimentary

Description

[Tanium Threat Response Analyst](#) is designed for security incident response practitioners investigating breaches involving lateral movement, fileless attacks using "living off the land" methods, injected code, and data exfiltration. Students will benefit from hands-on experience with Tanium Threat Response including Sensors, host-Level forensic timelines, analysis of acquired files, memory analysis techniques for finding common injection tradecraft, use of intelligence such as Tanium Signals and Indicators of Compromise.

Prerequisites

Recommended: Getting Started With Tanium

ADVANCED COURSES

For seasoned professionals and experts, our Advanced Courses offer the pinnacle of technical training. These courses are designed to challenge and push your boundaries, ensuring you remain at the forefront of your industry.

WORKING WITH TANIUM CORE: PROFESSIONAL FOUNDATIONS

Delivery | Duration

WBT: 8-10 hours | Public vILT, Dedicated vILT/ILT: 2 days

Cost

\$

Description

[Working With Tanium Core: Professional Foundations](#) is designed for experienced Tanium operators, focusing on practical workflows and hands-on lab activities with Tanium Asset, Benchmark, Certificate Manager, Discover, Enforce, and Investigate. By the end of this course, you will be proficient in leveraging these foundational Tanium modules for a variety of advanced use cases and scenarios.

Prerequisites

Recommended: Getting Started With Tanium and Tanium Essentials (or equivalent knowledge)

WORKING WITH TANIUM ENDPOINT MANAGEMENT

Delivery | Duration

Public vILT, Dedicated vILT/ILT: 2 days

Cost

\$

Description

[Working With Tanium Endpoint Management](#) is an immersive training bundle covering practical use cases of Tanium's operations-focused capabilities, including Patch, Deploy, Provision, Performance, Engage, Jump Gate, and Screen Sharing.

Prerequisites

Recommended: Getting Started With Tanium, Tanium Essentials, and Working With Tanium Core: Professional Foundations (or equivalent knowledge)

TANIUM
Learning Center

WORKING WITH TANIUM ENDPOINT RISK AND SECURITY

Delivery | Duration

WBT: 4-6 hours | Public vILT, Dedicated vILT/ILT: 2 days

Cost

\$

Description

[Working With Tanium Endpoint Risk & Security](#) is an immersive training bundle covering the installation, maintenance, usage, and configuration of risk and security-focused Tanium modules, including Impact, Enforce, Threat Response, Comply, Integrity Monitor, Reveal, and Benchmark.

Prerequisites

Recommended: Getting Started With Tanium, Tanium Essentials, and Working With Tanium Core: Professional Foundations (or equivalent knowledge)

TANIUM
Learning Center

WORKING WITH TANIUM SERIES

The Advanced Courses below are available for purchase and currently offered as 2-hour Web-Based Trainings (WBT). The recommended prerequisites for these are Getting Started With Tanium and Tanium Essentials. You can find more information about each module on the course outlines for [Working With Tanium Endpoint Management](#) and [Working with Tanium Risk & Security](#).

Working With Tanium Asset

After completing Working with Tanium Asset, you will be able to perform advanced workflows, such as building comprehensive reports, designing custom solutions using sources, extending visibility with integrations, and leveraging Asset's Software Inventory Usage (SIU) and Software Bill of Materials (SBOM) capabilities.

Working With Tanium Benchmark

After completing Working with Tanium Benchmark, you will be able to perform advanced workflows, such as using criticality to identify important devices, leveraging Benchmark data to prioritize remediation, and conducting executive risk assessments.

Working With Tanium Certificate Manager

After completing Working with Tanium Certificate Manager, you will be able to perform advanced workflows, such as inventorying and reporting on certificates, finding and replacing expired certificates, and exposing weak cipher usage in your certificate inventory.

Working With Tanium Comply

After this course, you will be able to perform basic functions such as installing, updating, and configuring Tanium Comply, importing assessment engines, java runtime environments, and standards, managing assessments (including remove vulnerability), customizing compliance benchmarks and vulnerability sources, and troubleshooting common Comply issues.

Working With Tanium Deploy

In this course, you will explore the core workflows in Tanium Deploy, from building software packages and bundles to creating manual, self-service, and automated deployments. Through realistic scenarios and hands-on lab activities, you learn how to configure Deploy for your organization, and monitor deployment activity through reports and dashboards.

Working With Tanium Discover

After completing Working with Tanium Discover, you will be able to perform advanced workflows, such as proactive asset discovery and network hygiene enforcement, using labels and locations to contextualize data, identifying lost interfaces, and correcting misconfigurations.

Working With Tanium Enforce

After completing Working with Tanium Enforce, you will be able to perform advanced workflows, such as using criticality to identify important devices, leveraging Benchmark data to prioritize remediation, and conducting executive risk assessments.

Working With Tanium Engage

In this course, you learn to use Tanium Engage to gather employee feedback and resolve digital experience issues across your environment. You will gain insights into best practices and configuration strategies to maintain a positive digital employee experience.

Working With Tanium Impact

After completing Working with Tanium Impact, you will be able to perform basic functions such as installing, updating, and configuring Tanium Impact, identifying lateral movement risks, and measure improvement as lateral movement risks are mitigated.

Working With Tanium Investigate

After completing Working with Tanium Investigate, you will be able to perform advanced workflows, such as identifying the root cause of performance issues, collaborating with team members to resolve issues, and leveraging the advanced Windows remote management features of Tanium Investigate.

Working With Tanium Integrity Monitor

After this course, you will be able to perform basic functions such as installing, updating, and configuring Tanium Integrity Monitor, creating customized watchlists, using monitors to watch changes in files and directories, working with rules, exporting event data, integrating ServiceNow, and troubleshooting common Integrity Monitor issues.

Working With Tanium Jump Gate

In this course, you will explore advanced workflows for securing privileged remote access through Tanium Jump Gate. You will gain insights into best practices and configuration strategies to maintain a secure environment.

Working With Tanium Patch

In this course, you will learn how to configure and manage Tanium Patch to keep Windows and Linux endpoints current. Through realistic scenarios and hands-on labs, you'll build patch and block lists, schedule deployments, and monitor compliance.

Working With Tanium Performance

In this course, you learn to use Tanium Performance to monitor endpoint and application health across your environment. You will gain insight into best practices and configuration strategies to maintain healthy, responsive endpoints.

Working With Tanium Provision

In this course, you will explore advanced workflows within Tanium Provision that enhance efficiency and improve endpoint provisioning management. By the end, you will gain practical skills to implement these techniques, maximizing the capabilities of Tanium Provision in your organization.

Working With Tanium Reveal

After completing Working with Tanium Reveal, you will be able to perform basic functions such as installing, updating, and configuring Tanium Reveal, using rules and rule sets, developing custom rule patterns, and integrating them into rules, configuring profiles, and troubleshooting common Reveal issues.

Working With Tanium Screen Sharing

In this course, you will explore advanced workflows for initiating and performing screen sharing sessions with Tanium's ScreenMeet integration. You will gain insights into best practices and configuration strategies to improve remote support while maintaining security.

Working With Tanium Threat Response

After completing Working with Tanium Threat Response, you will be able to perform basic functions such as installing, updating, and configuring Tanium Threat Response, finding and remediating compromises, and troubleshooting common Threat Response issues.

TANIAM CAREER CERTIFICATIONS

ABOUT OUR CERTIFICATION PROGRAM

The Tanium Career Certification Program aligns certifications to job roles of users, from the Tanium Administrator to the front-line analyst/incident responder and proactive investigator/hunter. Certifications are developed by analyzing the skills, knowledge and abilities of subject matter experts who use the Tanium platform daily – to ensure professionals who hold certifications have demonstrated proficient use of the Tanium platform.

Candidates can take Tanium certification exams through the global network of Pearson VUE Test Centers or take the exam online using Pearson's On VUE testing service. The cost for each exam is one (1) exam voucher; candidates will have one (1) opportunity per voucher to pass the exam successfully. Exams are time-based. Upon successful completion of an exam, the candidate will receive a score report. Certifications are valid for two (2) years.

Head over to [Certifications | Tanium](#) to learn more and get started on your certification journey!

CERTIFICATIONS

TANIAM CERTIFIED OPERATOR (TCO)

Description	This entry-level certification is a starting point for individuals interested in beginning their journey with Tanium certifications. TCO certification serves to identify candidates who can demonstrate core foundational knowledge and skills of basic Tanium functionality.
Prerequisites	None
Recommended Training	Getting Started With Tanium and Tanium Essentials
Exam Guide	CERT-TCO-Exam-Overview.pdf (tanium.com)

TANIMUM CERTIFIED ADMINISTRATOR (TCA)

Description	This next-level certification is for individuals interested in enhancing their Tanium certifications portfolio or progressing into the Tanium Professional level certifications. This certification focuses on those with the job roles and/or expertise to administer Tanium.
Prerequisites	TCO Certification
Recommended Training	Tanium Administrator 3.0
Exam Guide	CERT-TCA-Exam-Overview.pdf (tanium.com)

TANIMUM CERTIFIED SPECIALIST CLOUD DEPLOYMENT (TCS-CD)

Description	The Tanium Certified Specialist Cloud Deployment Certification validates an individual's knowledge around qualifying, planning, configuring and operationalizing deployments on Tanium Cloud.
Prerequisites	TCO Certification
Recommended Training	Tanium Cloud Deployment and Working With Tanium Core
Exam Guide	CERT-TCS-Exam-Overview.pdf (tanium.com)

TANIMUM CERTIFIED PROFESSIONAL ENDPOINT MANAGEMENT (TCP)EM)

Description	TCP)EM serves to identify candidates who can demonstrate the ability to manage, report on, and administer Tanium's operations focused module capabilities to achieve operational effectiveness. The exam consists of 60 total score points, including multiple choice items and practical application items.
Prerequisites	TCO Certification
Recommended Training	Working With Tanium: Endpoint Management Bundle (WBT or ILT)
Exam Guide	CERT-TCP)EM-Exam-Overview-EN.pdf (tanium.com)

TANIUM CERTIFIED PROFESSIONAL ENDPOINT RISK AND SECURITY (TCPRS)**Description**

TCPRS serves to identify candidates who can address common use cases in Security, Risk, and Compliance using Tanium. The exam consists of 60 total score points, including multiple choice items and practical application items.

Prerequisites

TCO Certification

Recommended Training
